

Harbourline Energy Co.

Safety Incident Reporting Standard

Field	Value
Document ID	HS-POL-005
Version	6.0
Effective date	2025-06-01
Policy owner	Colin Fraser, Director, Health and Safety
Approved by	Dana Okafor, Chief Operating Officer
Applies to	All employees and contractors at Harbourline workplaces
Next scheduled review	2026-05-31

1. Purpose

Prompt and accurate incident reporting lets Harbourline care for injured people, meet legal notification duties, and learn from events before they cause serious harm. This standard defines what must be reported, when, and to whom.

2. Scope

The standard covers injuries, illnesses, near misses, electrical contacts and flashes, vehicle incidents, dangerous occurrences and property damage, in Ontario, New York and Ohio.

3. Definitions

Term	Meaning
Near miss	An event that could have caused injury or damage but did not.
Serious incident	A fatality, critical injury, hospital admission, electrical contact, arc flash, or a fire or explosion.
SafeLine	Harbourline's incident management system.
Safety Duty Officer	The on-call safety professional, available 24 hours a day.

4. Reporting Timelines

Event	Internal requirement
Any incident	Report to supervisor immediately; enter in SafeLine within 24 hours
Serious incident	Notify Safety Duty Officer within 1 hour at 1-888-555-0199
Near miss	Enter in SafeLine within 48 hours
Vehicle incident	Report to supervisor and Fleet within 24 hours

4.1 Ontario legal notifications

For a critical injury or fatality, the Ministry of Labour, Immigration, Training and Skills Development must be notified immediately as required by the Occupational Health and Safety Act, and the scene must not be disturbed except to save life or prevent further injury. Lost-time or health care injuries are reported to the WSIB (Form 7) within 3 days of learning of them. The Safety Duty Officer makes these notifications;

supervisors must not contact the regulator directly.

4.2 United States legal notifications

OSHA must be notified of a work-related fatality within 8 hours, and of an in-patient hospitalization, amputation or loss of an eye within 24 hours. The Safety Duty Officer makes these notifications.

5. Investigation

Serious incidents are investigated by a team led by a Health and Safety advisor, with a Joint Health and Safety Committee worker member in Ontario. The root cause analysis is completed within 10 business days, and corrective actions are tracked in SafeLine to closure. A Safety Alert is issued company-wide within 48 hours of any electrical contact.

6. Roles and Responsibilities

Role	Responsibility
Worker	Stops work, gets help, reports immediately, preserves the scene.
Supervisor	Ensures care, enters SafeLine report, starts initial review.
Safety Duty Officer	Makes regulatory notifications and mobilises investigators.
Director, Health and Safety	Owns this standard and reports statistics monthly to the executive team.
